

## Teacher resource

### One-pager

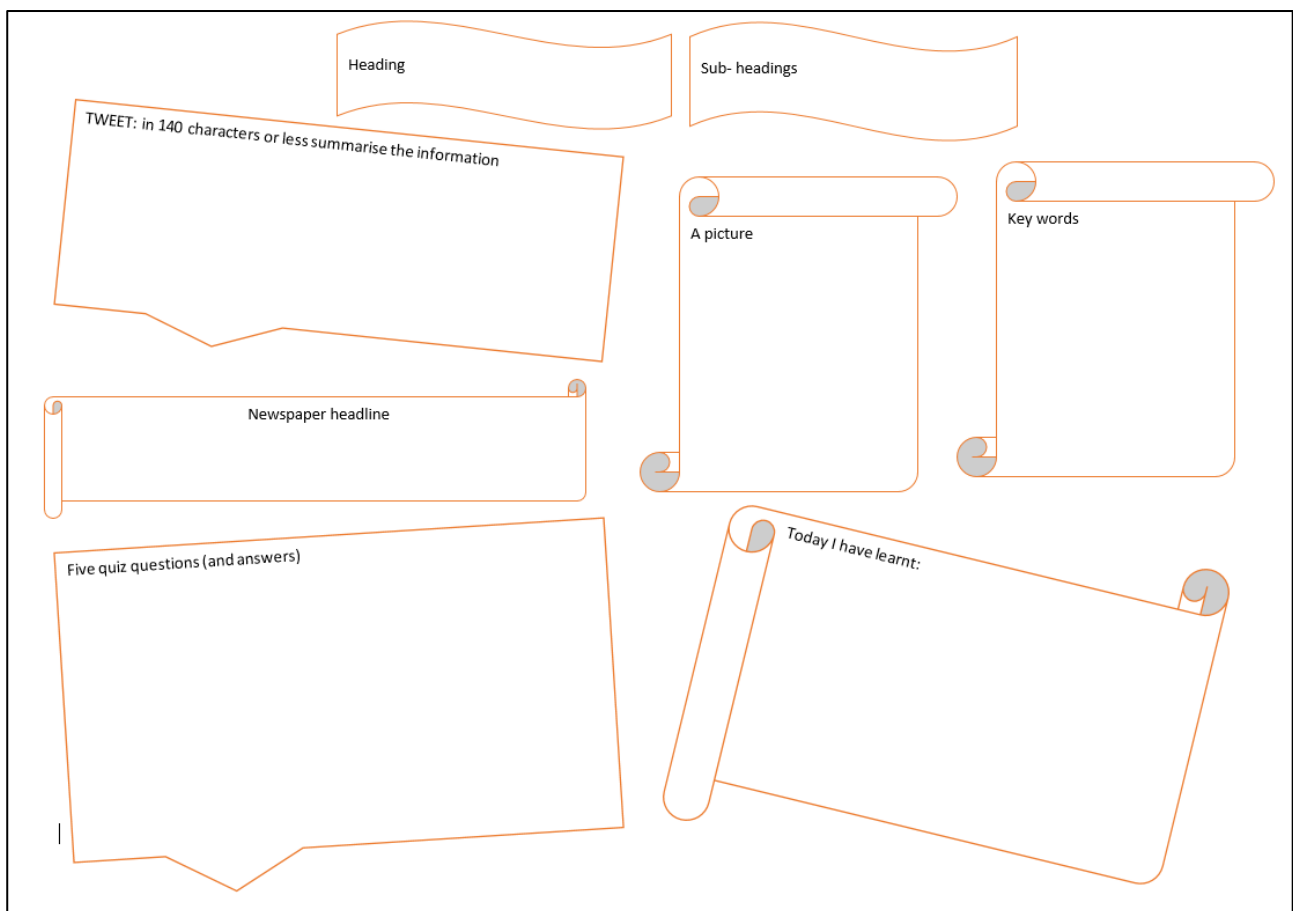

#### One-pager instructions

A *One-pager* is a written or typed graphic interpretation, on a single sheet of paper, demonstrating what students have learnt from a topic. It may include dot points, diagrams and other elements that summarise the topic.

#### Guidelines:

- Fill the entire page.
- Use colour where possible
- Include the following:-
  - Headings and subheadings
  - The meaning of any key words in the text
  - Include a picture to show what you have learnt
  - Write 5 quiz questions (and answers)
  - Write a newspaper headline to summarise the topic
  - Tweet what you have learnt in 140 characters
  - Complete the following: Today I learnt.....

A one-pager can be designed by students, created using digital tools such as PowerPoint or follow a template provided by the teacher.

The template is a large rectangular frame containing several distinct sections, each with a label and a decorative border. The sections are:

- Heading**: A wavy-edged box at the top left.
- Sub-headings**: A wavy-edged box at the top right.
- TWEET: in 140 characters or less summarise the information**: A large, irregularly shaped box on the left side.
- A picture**: A rectangular box with rounded corners and a drop shadow on the right side.
- Key words**: A rectangular box with rounded corners and a drop shadow on the right side.
- Newspaper headline**: A rectangular box with rounded corners and a drop shadow on the left side.
- Five quiz questions (and answers)**: A large, irregularly shaped box at the bottom left.
- Today I have learnt:**: A large, irregularly shaped box at the bottom right.

An example of a template.

# AN EXAMPLE OF A ONE PAGER

## 12.4 Allocation of resources

**HEADINGS:** What to produce?  
 How to produce?  
 Who to produce for?

**THE BASIC ECONOMIC PROBLEM**

**BOLD WORDS**

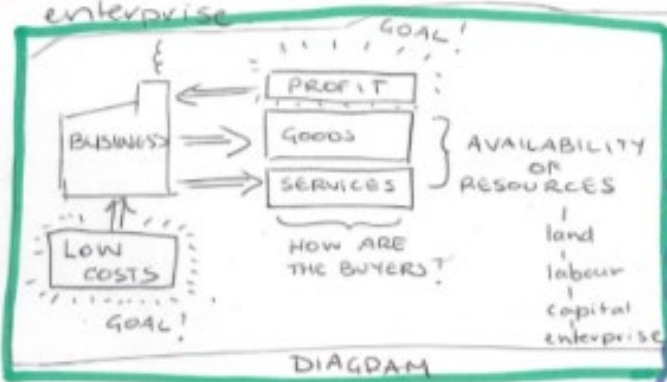

**Resource allocation:** how we divide resources and how they are distributed to consumers.

**Resources:** the factors of production, all the things we need to create a finished product.

**Factors of production:** land, labour, capital and enterprise

**SCARCITY**

**TODAY** I learnt that businesses aim to make profit by using resources to produce.

### QUIZ

- Which of the following is considered to be 'land'?
  - money
  - minerals
  - management
- How many factors of production are there?
- What is the basic economic problem?
- How do businesses decide what to produce?
- Why is there SCARCITY?

**HEADLINE**

**SCARCITY:- What you want vs what you need?**

### TWEET

The economic problem arises because we don't have enough resources to produce the goods & services that would satisfy our unlimited wants. Businesses decided what to produce based on three main questions, the availability and cost of resources and demand from consumers.

An example of a hand written, student designed one-pager summarising a section of a textbook.
